

FUN RE-USE: Make A Paper Tube Dog!

1. On a toilet paper tube, draw a pair of lines on the bottom half of the tube, near the edges.
2. Use craft knife carefully to cut slits on each drawn line.
3. Make a pair of legs:
 - a) Draw a circle by tracing the end of the tube.
 - b) Decide the length of the legs and use ruler to draw a horizontal line below the circles. Draw a pair of vertical lines from outside edge of circle to horizontal line.
 - c) Draw another set of vertical lines between those, to define the inner edges of the legs.
 - d) Cut out the whole piece.
4. Make second pair of legs (follow directions in step 3 again.)
5. Apply glue to top curved edge of each set of cardboard legs and then insert them into the slits on the tube. Push the piece gently until the curved edges touch the inside walls of the tube. Once both legs are in and positioned, your tube should be able to stand well.
6. Draw a dog head onto cardboard or construction paper. Start out with a basic shape (circle, oval, etc). Then draw a pair of ears and cut the piece out.

MATERIALS:

- toilet paper tube
- cardboard
- scissors
- marker
- ruler
- pencil
- craft glue
- glue gun or double stick tape
- craft knife
- acrylic paint
- paintbrush

OPTIONAL:

- ribbon
- yarn
- wiggle eyes or buttons
- felt
- fake fur
- pom poms for nose

FUN RE-USE: Make A Paper Tube Dog!

7. To be able to attach the head, you'll need a tab. So cut a small rectangle, bend it, and tape it to the back of the head.
8. Glue it to the top part of the tube. If you used cardboard, it will need the glue gun for a stronger hold. If you used construction paper, craft glue should be fine.
9. Draw and cut out a tail from cardboard or construction paper. Make the tail long enough to have a tab edge for gluing. Glue or tape the tab end of tail to the inside top of the tube, at the back, opposite of the dog head.
10. When your glue is dried, paint the entire dog with acrylic paint in the color(s) of your choice. Then paint details like spots, toe lines, and ears (these can be a different color.)
11. For the eyes, paint them or draw on with a marker. You can also glue on wiggle eyes or buttons if you'd like. For the nose, paint or draw on, or glue on a pom pom. If you'd like, finish your dog with a collar and leash made from ribbon or yarn.
